

Entities overview

CASTEMO recognizes **11 entity types** (SPECTRABLOG – Statements, Persons, Events, Concepts, Territories / Texts, Resources, Actions, Living Beings, Locations, Physical Objects, and Groups). With this list, you should be able to do most of what a project needs.

Institutions are coded, depending on meaning and context, as Groups (e.g. if an institution is acting) or Locations (e.g. if it is institution in the sense of repository for a manuscript).
